Pastor Watt,

We heard back from the acrylic fabricators and I have a final estimate for your sign project that includes:

1. Removal and disposal of existing signage.
2. Fabrication and installation of new signage including 3m vinyl, laminated and mounted on polymetal backstrate, acrylic crosses cut and and laminated with vinyl mounted to polymetal signage.

Cost of total project=\$3650 including all taxes and fees.

We can source high output solar lights that would probably work well, but I'd advise you to order your own and save on our mark-up.

The raised acrylic letter option that we discussed would cost another \$1300. If you decided to go that route....we would mount all the letters using 3m double sided auto-tape.

Please let me know if you have any questions/concerns and I'll do my best to get back to you ASAP.

Regards,

Lou
